## Customer Accounts

Built in support for customer accounts. Most POS companies do not even offer this the ones that do charge you a lot for it and some even use third party for it. Not only can we use customer accounts in our POS but we can enhance/customize it to do truly awesome things. **Loyalty** can be intertwined with customer accounts, twitter, emails, text messages all can be integrated with customer accounts. Who else is offering this?

### Accept Payment Integration:

Digital payments are needed to meet customer requirements. Our POS can be integrated with multiple payment options as needed.

## ADVANCED ACCOUNTING, INVENTORY AND REPORTING SYSTEM

With a 360-degree, real-time dashboard, you can get accounting reports for all business processes.

**Inventory, payments, cashier system, periodical checks, sales, and product management**, can all be done as per your needs.

### Accounts:

Monitor Cash Expenses Transactions - A lot of outlets incur a number of small expenses which are paid by cash. The POS should allow you to link these cash expenses with your cash income, and generate a statement with the daily cash expenses.

Accounting feature to display the **Credit and Debit** transaction across different account types and transaction, get to track income and expenses, which is essential for understanding business **margins**.

### Inventory:

Manage and monitor inventory movements in real time: This includes, inventory purchases, sold inventory/stock, remaining inventory stock. The system has an inbuilt recipe and purchase management system, which can be used to track inventory, generate Food Cost Reports, Vendor-wise Purchase Reports, and much more.

Warehouses/Stores: Make inventory transfer **between warehouses or stores**, receive stock from multiple suppliers, and use our in-built inventory or stock-taking feature to balance physical inventory.
